## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to compositions of Salmonella bacterium, classified in class 435, subclass 325.
  - II. Claims 15-28, drawn to methods of conferring immunity, classified in class 424, subclass 184.1.

Additionally, Groups I-II are further restricted to inactivation of a single gene. For instance claims 5, 6, 7, 9, 19, and 24 recite inactivation of ssaT, ssaJ, ssaC or ssaM. Inactivation of each of these distinct genes is a separate invention. Consequently, Applicant's are restricted to inactivation of a single one of these genes. Note a combination of inactivated genes is permitted so long as the elected gene is included as a primary inactivation.

Finally, as set forth in MPEP 803.04 nucleotides encoding separate proteins are separate inventions. Consequently, Applicant's are further restricted to a single nucleotide sequence for the elected gene. For instance if Applicant's elect the ssaT gene, restriction to SEQ ID NO: 1 or SEQ ID NO: 2 is required.

2. The inventions are distinct, each from the other because of the following reasons:  
Inventions I, drawn to compositions and Invention II, drawn to methods of conferring immunity are related as product and process of use. The inventions can be shown to be distinct if either or

Art Unit: 1645

both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the composition of the Salmonella bacterium can be administered in vivo to elicit an immune response as claimed, or alternatively, may be incorporated into an in vitro assay to screen for the presence of anti-sera.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their separate classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
